Re: BLM No. UTU-072863 River Dredge Operation

Dear Mr. Foster:

We have reviewed a copy of your Notice or Plan of Operations. We received a copy of the notice from the Bureau of Land Management on April 20, 1995.

This project is for running a 3-inch dredge in Trout Creek in Juab County.

A permit from this office is not required, provided that you do not use any larger than a 3-inch dredge in the stream bed or the suction pump is rated less than 15 HP. However, you must advise us for review of any water quality impacts, if your activities generate any waste water which would be discharged to the ground or surface waters of the state.

You must contact the U.S. Fish and Wildlife Service for compliance with the Endangered Species Act. You must also contact the Utah Division of Water Rights and the US Army Corps of Engineers, for compliance with stream bed alteration requirements.

If we can be of further assistance, please contact me or Mr. Lyle Stott of my staff.

Sincerely,

Kiran L. Bhayani, P.E., D.EE., Manager
Design Evaluation Section
